<b>PFOA and its salts, Perfluorooctanoic acids C8F15O2X (X = H, NH4, and Metal salts), all members</b>		D	LR	In Canada PFOAs have been declared CEPA Toxic and the government has proposed a ban on the use, manufacture, release, and import of PFOAs. A regulation is expected in 2014/2015. In January 2006, the EPA created a Voluntary Stewardship Program to reduce facility emissions and product content of PFOA, its higher homologues, and related chemicals including precursors on a global basis by 95 percent no later than year-end 2010, and to work toward eliminating emissions and product content of these materials by 2015. Norway has recently issued a regulation for PFOA in consumer products and several US states (New Jersey, Minnesota) have issued drinking water guidelines for PFOA. USEPA has also established drinking water limits in the Parkersburg, WVA vicinity. The EU has issued a directive on PFOS and has PFOA under review.			Fluoropolymers are used to make automotive components, including fuel hoses, gaskets, wire insulations, bearings.
